Harry Potter Science

(Science, Technology, Engineering and Math)

Think Create Innovate Educate

Classes Start: Thursday Jan. 18th

10 Sessions: 1/18, 1/25, 2/1, 2/8, 2/15, 2/22,
3/1, 3/8, 3/15, 3/22

**Have you always wanted to attend
The Hogwarts School of Magic?**

Harry Potter Potions K-6th Grade

You'll love this class! Become a science wizard as you explore the magic of chemistry in fun, educational science labs inspired by the Harry Potter books and movies!

This hands-on science lab explores chemistry with safe "kitchen chemistry" ingredients. Each week students will engage in a new lab project; including experiments, simulations and creative art activities. Students build science vocabulary & higher order thinking skills.

We'll design, make and test potions that actually work! Learn about the special effects that have made the Harry Potter Movies so successful!

Students will be forming hypothesis, making & recording observations and results, measuring, forming conclusions, and displaying. Our instructors are experienced teachers who help children learn through experimentation!

Register on-line:

At www.camperegsecure.com/wcdowgro/

Registration begins: Thursday, Nov. 16th
After school transportation will not be provided!

\$145
(Materials Fee Included)
